Special Session: Intelligent Systems and Applications

Scope and topics

The aim of this special session is to explore and debate the main concepts and implications of intelligent systems and applications. How it can be a driver of innovation and positive effects in our societies, industry, legal systems, and economic/financial system.

For this session we seek original, unpublished contributions that are mainly focused on, but not necessarily limited to, the following topics:

- Deep learning technologies and applications in intelligent systems
- Optimization algorithms and applications in intelligent systems
- Neural network technologies and applications in intelligent systems
- Prediction mechanisms and applications in intelligent systems
- Recommendation mechanisms and applications in intelligent systems

Special Session Organizers

	<p>Dr. Tsu-Yang Wu Associate Professor College of Computer Science and Engineering, Shandong University of Science and Technology, China wutsuyang@gmail.com</p>
	<p>Dr. Chein-Min Chen, SMIEEE Associate Professor College of Computer Science and Engineering, Shandong University of Science and Technology, China chienmingchen@ieee.org, chienming.taiwan@gmail.com</p>
